General Description

The XC6201P is a low-dropout (LDO) voltage regulators with enable function offering the benefits of high input voltage, low-dropout voltage, low-power consumption, and miniaturized packaging.

The features of low quiescent current as low as 2.0 μ A and zero disable current is ideal for powering the battery equipment to a longer service life. The XC6201P

is stable with the ceramic output capacitor over its wide input range from 2V to 12V and the entire range of output load current.
